**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2157

1. The amendment filed 11/16/2004 has been entered and considered by the examiner.
2. Claims 1-24 are presenting for examination.
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-2, 4-10, 12-20, and 22-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Sahai (US Pat. No. 6,594,699).
5. As to claim 1, Sahai shows in Fig 1, a method of presenting custom information to an HTTP client 12 from an HTTP server 10 (the internet 14 couples the client 12 and the server 10 i.e using HTTP protocol, see col 2, lines 446-50), see col 1, lines 6-15, lines 55-58, col 2, lines 16-28. The method comprising the steps of:
  - creating a plurality of state objects (client's capabilities and user's preferences) at the HTTP client 12, see col 3, lines 64-67;
  - storing the state objects on the client 12 prior to an initial interaction with the server 10, see col 3, lines 64-67;
  - initiating an interaction between the client 12 and the server 10, see col 5, lines 2-4, col 6, lines 60-63;
  - requesting information from the server 10, see col 5, lines 2-4, col 6, lines 60-63;

Art Unit: 2157

- sending at least one of the state objects to the server 10 so that the information can be formatted responsive to the sent state object, see col 5, lines 21-39, col 6, lines 66-67, col 7, lines 1-3; and
- receiving the formatted information by the client 12, see col 5, lines 41-46, col 6, lines 12-23, lines 47-49.

6. As to claim 2, selecting one state object based on the information requested and prior to any interaction between the client 12 and the server 10, see col 3, lines 56-60, col 4, lines 25-27.

7. As to claim 4, the plurality of state objects include at least one attribute (user preference), see col 2, lines 61-62, col 5, lines 23-24.

8. As to claim 5, defining the attributes (user preferences) by the user, see col 8, lines 19-23.

9. As to claim 6, creating and defining new attributes by a user, col 8, lines 27-32.

10. As to claims 7-10, 12-20, 22-24, the claims are similar in scope to claims 1-2, 4-6, and they are rejected under the same rationale. In addition, even though Fig 1 shows only one server 10 for simplicity and the system inherently having more than one server to present custom data to a client and the servers inherently could be in a single and/or different domains (notice that the network 14 is the Internet).

11. Claims 3, 11 & 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2157

11.1. The prior art of record does not teach automatically creating a state object by the client based on previously requested information to be stored on the client.

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Moustafa M Meky whose telephone number is 571-272-4005. The examiner can normally be reached on flex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ario Etienne can be reached on 571-272-4001. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
